About me

I am always eager to learn and grow my skills to keep up with new tech. With **over 3 years** of experience in mobile app development, I create apps that solve real problems for people.

I enjoy sharing ideas and working together to achieve team goals. Recently, I served as a team leader in a mentorship program, managing a team of three. My responsibilities included task distribution, code review, and explaining complex concepts during regular team meetings. This experience enhanced my **leadership** and **communication skills**.

My focus is on delivering real value to users and improving their experience. I believe in giving back to the developer community and sharing what I've learned.

I'm committed to continuous learning and growth, both for myself and those around me.

Work Experience

Flutter Developer

Freelancer

June 2023 - current (> 1 year)

Flutter Developer

[Codeware](#) | Full-time

Aug 2022 - Dec 2024 (34 months)

- **Solely responsible** for App development.
- Successfully Maintained, and Developed over 3 Projects
- Manage and distribute tasks and time under pressure situations.
- Dealing responsibly with **multiple daily tasks** of different projects, organizing, prioritizing, distributing, and following up on them in most cases til delivery to the client.
- **Product Project its name Albaheth**, work for it

Flutter Developer

[Semicolon Co.](#) | Full-time

Jan 2025 – current (3 month)

- **Solely responsible** for App development.
- Successfully Maintained, and Developed over 10 projects.
- Proven **problem-solving** abilities to identify and resolve issues.
- Manage and distribute tasks and time under pressure situations.
- Dealing responsibly with **multiple daily tasks** of different projects, organizing, prioritizing, distributing, and following up on them in most cases til delivery to the client.
- **Collaborating closely** with back-end developers, communicating requirements and clarifying data specifications for new projects and issue resolution.

Projects

Nursey App

- Developed a seamless platform for discovering nearby nurseries, exploring profiles, and subscribing with ease.
- Integrated the Flutter front-end with a .NET backend, ensuring smooth data flow and secure database interactions.
- Enhanced the UI/UX using Flutter widgets and state management for an intuitive user experience.
- Enabled real-time schedule updates, providing parents with peace of mind and convenience
- [App Store](#)

Mudir App

- Developed an innovative solution to enhance the buying and listing experience, ensuring seamless ad management within the app.
- Integrated interactive maps to enable users to easily locate sellers and view advertisement locations in real time.
- Optimized app performance, reducing load times and minimizing resource consumption for a smoother user experience
- Collaborated closely with the back-end team to implement secure and efficient data handling for listings and user interactions.
- [Google Play](#)
- [App Store](#)

QPart App

- An app designed for car enthusiasts to:
- Manage maintenance schedules.
- Find spare parts easily.
- Enhance the driving experience.
- Access essential car services effortlessly.
- Keep vehicles in top condition.
- Discover new ways to improve performance.
- [App Store](#)

Al-Tabakh

- Developed an educational platform where chefs can publish exclusive cooking lessons.
- Implemented a secure payment system for users to purchase and access premium lessons.
- Integrated a smooth and responsive UI to enhance the learning experience.
- Collaborated with the backend team to ensure seamless content management and transactions.
- Optimized performance for fast loading and efficient resource usage.
- [Google Play](#)
- [App Store](#)

Qareeb

- Comprehensive Delivery – The app allows you to order all your household essentials and shop from local stores without leaving your home.
- Easy to Use – Simply download the app and place your orders effortlessly through a smooth and user-friendly interface.
- Local Coverage – Shop from nearby stores, ensuring fast and convenient delivery.

- Fast Delivery Service – Receive your orders in record time with our dedicated delivery team.
- Affordable Cost – Enjoy shopping and delivery services for a very low fee.
- Comfort & Safety – Shop from home with ease and peace of mind, without the need to go out
- [Google Play](#).
- [App Store](#)

Mared

- Smart Location Selection – Choose your location on the map, and the app will show you the nearest restaurants.
- Wide Restaurant Variety – Enjoy a diverse selection of restaurants and cuisines to suit all tastes.
- Fast & Easy Ordering – Select your favorite meal and place your order in just a few simple steps.
- Quick Delivery – Receive your order in record time through a reliable delivery network.
- Total Convenience – Order your favorite food from anywhere and enjoy your meal without leaving your place
- [App Store](#)

Geo4physics

- Devised an innovative solution to solve the problem of accessing videos securely within the app, in close collaboration with the back-end developer.
- Achieved a reduction in the app's size and improved loading times and minimal device resource consumption.
- [App Store](#)

Albaheth

- Smart Location Selection – Choose your location on the map, and the app will show you the nearest restaurants.
- Wide Restaurant Variety – Enjoy a diverse selection of restaurants and cuisines to suit all tastes.
- Fast & Easy Ordering – Select your favorite meal and place your order in just a few simple steps.
- Quick Delivery – Receive your order in record time through a reliable delivery network.
- Total Convenience – Order your favorite food from anywhere and enjoy your meal without leaving your place
- **Not uploaded to stores**

Technical Skills

Core

- Flutter & Dart
- Android native basics

State Management & Arch

- BloC, Cubit & Provider
- Clean Architecture
- MVC Architecture

Back-end Integration

- REST API & Postman
- Firebase, FCM & APNs

Code Quality

- Clean code
- SOLID Principles
- Unit testing

Additional Skills

- Git & GitHub
- Data Structure
- Algorithms & Problem-Solving
- Design Patterns
- Google Maps

App Store Deployment

- Google Play console
- App Store & TestFlight

Certificates & Courses

• Flutter Clean Architecture

- [Udemy](#) - Usama Elgendy (2023)

• CS50

- [YouTube](#) - A. Gamal (80%)

• Git & GitHub

- [YouTube](#) - Elzero (2022)
- [YouTube](#) - BigData (2024)
